

Mujahid Islam- Flutter App Developer

islamemdmujahid@gmail.com || mujahid-islam.vercel.app || github.com/mujahid-islame || linkedin.com/in/mujahid-islam-933a3541a

Summary:

Flutter Developer with over 3 years of experience building and publishing high-performance cross-platform mobile apps. Skilled in Dart, Firebase, REST APIs, and advanced state management using Riverpod, Getx and Provider. Proven expertise in implementing clean architecture, integrating AI modules, and optimizing mobile performance. Successfully launched multiple SaaS and Alintegrated apps with scalable, maintainable codebases and visually appealing UI/UX

Technical Skills:

Languages&Frameworks: Dart, Flutter

StateManagement: Provider, GetX, Bloc

Database&Backend: Firebase, Firestore, Firebase Cloud Functions, RESTful APIs

JSON Tools & DevOps: Git, GitHub, Agile, Postman, Debugging Design & Architecture: Clean Architecture, MVVM, MVC, Repository Pattern

Other: Google Maps API, In-App Purchases, AdMob, Push Notifications, Lazy Loading, AI Integration, Responsive UI, Material Design, App Deployment (Play Store, App Store)

Education: Diploma in Engineering Computer Science | Model Institute of Science & Technology | Graduation: 7th Semister Running

Experience:

- Contributed to the development of 7 Flutter applications by writing clean, maintainable Dart code and implementing responsive, user-centric UI/UX following Material Design principles.
- Improved application performance through lazy loading and Firebase integration while enhancing app stability with efficient error handling.
- Developed 2 Flutter applications from scratch, implementing API integration, lazy loading, and clean architecture to improve performance and ensure robust error handling.
- Developed 3 scalable Flutter applications, following clean architecture and implementing performance optimization techniques to improve user experience and code maintainability.
- Developed core application modules involving Firebase, Cloud Functions, real-time features, and responsive UI/UX, improving application performance, reliability, and maintainability.

Project:

1. Note App Project
<https://github.com/mujahid-islame/note>
2. Ip Info getter App Project
<https://github.com/mujahid-islame/lp-Info-Getter-App>
3. Simple Calculator App Project
<https://github.com/mujahid-islame/Simple-Calculator>

1. Tik Tok Toe Game App Project
<https://github.com/mujahid-islame/Tic-Tac-Toe-Simple-Game>
2. Tabe Battle Game App Project
<https://github.com/mujahid-islame/Tabe-Battle-Game>
